

# Flex MXU NID

The Precision Flex MXU terminals offer a flexible and cost-effective solution for fiber network deployments. Patch and Splice Terminals are ideal for use with splice-ready fiber cable feeding an IDF closet or small multi-dwelling units (MDUs). Their compact footprint and intuitive cable routing make them the right choice for network deployments where wall space is critical. The bulkhead enclosure contains 12 SC adapters and capacity for up to 16 fusion splices.
