

Increased storage for incoming / outgoing fiber without compromising space or function. The perfect all-in-one for SFU & small MDU deployments. How do you improve on an already popular, feature rich product? Sometimes you just have to simplify it. Our Standard Size Flex NID has been popular with FTTX installers since it's release because of it's craft friendly splicing and connectivity features. But...some installers really wanted more slack storage. So we gave you both! We've made slack storage the star in this version by moving the splice tray to the back of the NID and maximizing space in the storage system. Installers still get great splicing accommodation but with substantially increased slack storage!

FEATURES

HOLDS UP TO 4 SC OR 8 LC BULKHEAD ADAPTERS

FIELD SELECTABLE BULKHEAD POSITIONS

PRECISION FLEX CLIPS OFFER 3 CHANNEL SEPARATION OF STRENGTH MEMBER, BUFFER TUBE AND I/O FIBER

STORE OVER 100' OF 3.0MM I/O JUMPER
