

ONT NID Cable Management Transition Plate

The transition plate was designed to retrofit the outdoor ONT NID for use with Indoor ONTs. Often, customers continue to use the ONT NID even after moving indoors but have no way to deal with slack management. Problem solved! Simply snap the Transition Plate into the NID where the outdoor ONT once sat and you are ready to deploy with clean cable management.

FEATURES

FITS EXISTING ONT NID HINGE MOUNTS

HOLDS UP TO 150 FEET OF 3MM
