

# Midsized Deep Base FlexNID (MFLEX-DB)

Packed full of features for more efficient and cleaner installs, the M-FLEX DB perfectly bridges large NID functionality and compact NID aesthetics. An installation tech's dream NID, the new M-FLEX DB includes a base that is ½" deeper and a toolless clear splice tray cover. It features a flat-drop channel that secures aerial drops with flat-drop clips, minimizing the need for anchor holes in residential properties. Additionally, it provides more mounting options with additional internal and external mounting holes. A push-through grommet allows the installer to enter the customer premise directly from the back of the NID. The M-FLEX DB integrates with Precision Group's new line of pre-loaded I/O jumper spools. This Flex Line NID is also compatible with our wide selection of input and output grommets, offering the ability to accommodate round drop, flat drop, or I/O fiber using a unique set of flex-lock split and conduit grommets that ensure cable entries remain protected from the elements.

## FEATURES

POLE OR WALL MOUNT

FIELD SELECTABLE BULKHEAD POSITIONS

HOLDS UP TO 4 SC OR 8 LC BULKHEAD ADAPTERS

PRECISION FLEX CLIPS OFFER 3 CHANNEL SEPARATION OF STRENGTH MEMBER, BUFFER TUBE AND I/O FIBER
