

A2 Indoor/Outdoor UV Rated Singlemode Fiber Jumper

Specifically designed to go from the outdoor NID to the indoor ONT. The Bend Insensitive glass allows for bending and stapling. The I/O jacket protects against UV and extreme weather. The detached connector housing option allows for drilling smaller holes during installation. Precision Group stocks Superior Flex jumpers in SCA-SCA of 10, 25, 50, 75, 100 or 150ft lengths. We will be happy to make custom lengths and custom connector combinations per your specifications.
