

Tool-Less Express NID (EXPRESSTL)

The Express TL is the next evolution of the PF-Express-1000 NID—redesigned with installers in mind. Its fully tool-less design simplifies assembly and speeds up production while maintaining the durability and flexibility installers expect in the field. Built as a scalable platform, Express TL makes it easier to adapt and expand without starting from scratch.

- Faster builds with fewer components to manage
- Tool-less design simplifies assembly and reduces handling time
- Built as a modular platform with interchangeable back plates—use the same NID, change the inside, and build it your way
