PFCCFANOUT

# Color-Coded Fiber Pigtail Fanout

Precision Group's color-coded fiber pigtail fanout assemblies provide organized fiber termination for MDU applications, network interface devices (NIDs), distribution panels, and splice enclosures.

Each assembly transitions a multifiber cable into individual, color-coded connectorized legs for easy fiber identification, routing, and connection to adapters. The unterminated cable end allows for splicing into the fiber network.

Available in multiple fiber counts, cable types, connector styles, breakout diameters, and lengths to meet a variety of installation requirements.

## FEATURES

- TRANSITIONS MULTIFIBER CABLE INTO INDIVIDUAL CONNECTORIZED LEGS
- COLOR-CODED JACKETS SIMPLIFY FIBER IDENTIFICATION AND ROUTING
- UNTERMINATED CABLE END FOR FIBER SPLICING
- SUPPORTS ORGANIZED FIBER ROUTING AND TERMINATION
- AVAILABLE IN MULTIPLE FIBER COUNTS, CABLE TYPES, CONNECTOR STYLES, BREAKOUT DIAMETERS, AND LENGTHS
